

From Fragmentation to Trust: How Africa is Scaling DPI

The Challenge

- 500M+ Africans lack a legal ID
- Fragmented digital systems across countries
- Limited cross-border digital transactions

The Solution: Trust

The Smart Africa Trust Alliance (SATA) enables secure cross-border interoperability through

- Trusted digital identity
- Seamless data exchange
- Scalable digital payments

Built on eIDAS, AU Data Policy, AfCFTA Digital Trade Protocol

Trust is the currency of Africa's digital future

SATA endorsed by AU, ITU, Estonia, and ICT Ministers from 16 African countries

TAS 2025 will launch the Smart Africa Data Exchange (SADX) pilot between Ghana, Benin, and Rwanda
